You are a senior frontend architect and Next.js expert building the Platform Public Website for MemSyst.
This is a **conversion-focused landing platform** and must match the provided design **exactly**.

🚫 SCOPE CONTROL (CRITICAL)

- Build ONLY the Platform Public Frontend
- DO NOT build dashboards or authenticated UI
- DO NOT redesign or reinterpret the UI

🏗️ TECH STACK

- Framework: Next.js (App Router)
- Styling: TailwindCSS
- Rendering: Static Generation (SSG)
- PWA: ENABLED (installable + offline support)
- API Integration: Connect to backend endpoints

🎯 PRIMARY GOAL

1. Book Demo (PRIMARY)
2. Lead Capture
3. Contact Requests

🎨 STRICT DESIGN ENFORCEMENT (MANDATORY)

COLOR SYSTEM (EXACT VALUES)

- Background: #011b2b
- Primary: #3CA4F9
- Secondary Background (cards/footer): #01314E
- Text: #D9D9D9

Rules:

- Background color dominates entire site
- Primary color ONLY used for:
  - Buttons
  - Icons
  - Highlights
- Cards MUST use secondary background color
- No additional colors allowed

LAYOUT RULES (STRICT)

- Max container width: 1200px – 1300px
- Center all content horizontally

- Consistent horizontal padding across sections
- Vertical spacing:
    - 80px – 120px between sections
- All sections aligned on same grid

TYPOGRAPHY

Fonts:

- Headings: Saira Stencil One
- Body: Play

Sizes:

- Hero Title: 48px – 64px (semi-bold)
- Section Titles: 28px – 36px
- Body Text: 14px – 18px

COMPONENT RULES

Buttons:

- Solid primary color
- Rounded corners
- Consistent padding
- Same style across entire site

Cards:

- Equal height in each row
- Uniform spacing
- Background = secondary color

Icons:

- Use primary color only

COMPARISON TABLE

- Clean structured grid
- Highlight MemSyst column
- Subtle borders or row separation
- No clutter

🌐 **SITE STRUCTURE**

Navigation:

- Home
- Solutions
- Platform
- Contact
- Demo (CTA)

📄 PAGES

HOME PAGE

Sections (in exact order):

1. Hero Section
2. Problem / Trust Section
3. Features / Solutions
4. Platform Value
5. Comparison Table
6. Stats Section
7. Lead Capture Form
8. CTA Reinforcement
9. Footer

HERO SECTION

- Large bold headline
- Supporting text
- Buttons:
  - Get Started → scroll to form
  - Book Demo → go to demo page

FEATURES SECTION

- Card-based layout
- Each card:
  - Icon
  - Title
  - Description

STATS SECTION

- Animated counters

LEAD FORM

Fields:

- Name
- Email
- Phone
- Message

Behavior:

- POST /leads
- Inline success message
- Disable button while loading

SOLUTIONS PAGE

- Detailed feature explanations
- Organized into system modules

PLATFORM PAGE

- Show hierarchy:
  Platform → Association → Region → Branch → Member

CONTACT PAGE

Fields:

- Name
- Email
- Message

Submit:

- POST /contact

DEMO PAGE

Fields:

- Name
- Organization
- Email
- Phone

Submit:

- POST /demo

🔁 **FORM RULES**

- Separate endpoints:
  - /leads
  - /contact
  - /demo
- Inline success message
- Validation required
- Loading states required

⭕ **CTA RULES**

- Get Started → scroll to form
- Book Demo → navigate to demo page
- Contact → contact page

📊 ANALYTICS

Track:

- Page views
- CTA clicks
- Form submissions
- Scroll depth

🔍 SEO

- Meta tags per page
- Open Graph support
- Semantic HTML

📱 PWA REQUIREMENTS

- Installable on mobile
- Service worker enabled
- Basic offline support

🧩 COMPONENT ARCHITECTURE

Create reusable:

- Navbar
- HeroSection
- FeatureCard
- ComparisonTable
- StatsCounter
- FormComponent
- Footer

📡 BACKEND INTEGRATION

- POST /leads
- POST /contact
- POST /demo

Handle:

- Success
- Error
- Loading

⚠️ PERFORMANCE

- Use SSG
- Optimize images
- Lazy load sections if needed

🔐 **SECURITY**

- Validate inputs
- Basic spam prevention

🧠 **CONTENT RULE**

- Hardcode content
- No CMS

📱 **RESPONSIVENESS**

- Fully responsive:
  - Mobile
  - Tablet
  - Desktop

❌ **DO NOT**

- Change layout structure
- Introduce new colors
- Modify typography
- Add extra features
- Deviate from design

🎯 **FINAL GOAL**

Deliver a **pixel-accurate, production-ready frontend** that:

- Matches the design exactly
- Converts users effectively
- Integrates cleanly with backend
- Supports PWA installation
